Profile

Passionate Software Engineer with over half a decade of experience in modern web technologies. I specialize in React, Next.js, and TypeScript, focusing on building scalable, high-performance applications.

With a proven track record of leading teams, I've overseen large-scale migrations, improved code architectures, and streamlined workflows. I thrive in collaborative, innovative environments where I can contribute both technically and as a leader, helping teams deliver user-focused solutions.

Experience

— Lead Front End Developer, Citrus Systems; Belgrade, Serbia – 2021-2024

Led the migration of multiple iGaming platforms to modern technologies like React (Next.js) and Vue while managing a team of six developers. Oversaw containerization with Docker and implemented CI/CD workflows with build, test, and deploy stages.

Played a key role in improving code scalability, enhancing team productivity, and aligning technical solutions with business needs, driving successful large-scale migrations and developing npm libraries and SSG projects.

— Front End Developer, Citrus Systems; Belgrade, Serbia – 2020-2021

Overhauled a custom front-end framework for multiple iGaming projects, transitioning to a modular architecture. This role deepened my technical expertise and ignited my passion for leadership.

— UI/UX Designer / Web Developer, Freelance; Remote – 2019-2020

Created interactive prototypes and mockups in Figma, utilizing a well-organized design system to streamline development across mobile, tablet, and desktop viewports. Additionally, developed MVPs in React and vanilla JavaScript, ensuring rapid and efficient project delivery.

— Front End Web Developer, Boca Tech; Belgrade, Serbia – 2018-2019

This was my first commercial experience, where I gained exposure to team collaboration across departments. Alongside front-end development, I worked with the designer on UI/UX to ensure user-focused outcomes and also managed data entry, gaining insight into the broader workflow.

Education

Singidunum University; Valjevo, Serbia — Bachelor's Degree in Business Informatics

Skills

JavaScript, React, Next.js, TypeScript, HTML5, Redux, Vue, Pinia, Vuex, Docker, CSS, Sass, Testing, SQL, MongoDB, Node.js, Strapi, Git, Twig, Team Management, Leadership, Communication
